**BILLINGTON EXPORT LTD**

Specialists in vintage, rare and obsolete  
tubes and valves for audio and industry

**WHOLESALE VALVE & SOCKETS CATALOGUE  
DECEMBER 2025 v1**

[www.billingtonexportltd.com](http://www.billingtonexportltd.com)

**Established 1981**

**+44 (0)1403 784 961**

Our preferred contact method is via :

[sales@billingtonexportltd.com](mailto:sales@billingtonexportltd.com)

please as we need to check stock, prices & data which unfortunately cannot be done  
whilst you wait on the phone, so email communication is preferred, thank you.

**Please email or telephone, for prices and availability**

This catalogue is only a guide. Prices are usually accurate, but please contact us to confirm final prices and quantities.

**PLEASE ADD 50% RETAIL SURCHARGE FOR ORDERS UNDER GBP240.**

## THE CATALOGUE

Our aim is to provide top quality valves/tubes at competitive prices, to our customers all over the world. We try to treat our customers as we would want to be treated.

This catalogue lists our most popular lines and provides brief information, but is not a complete listing of our stock.

We have constantly moving stock and new items are always becoming available.

**PLEASE ENQUIRE ABOUT ANY TYPE NOT LISTED AS WE HAVE APPROXIMATELY  
1 MILLION VALVES IN STOCK**

We also stock sockets and top caps.

Please see our **SOCKETS AND MORE CATALOGUE** at the end of this Catalogue  
(this has its own page numbers, **SOCKETS 1**, etc))

Demand for audio tubes/valves continues to increase. We stock over one million rare and obsolete tubes/valves including brands such as Mullard, GEC, STC, Brimar and other classic brands such as RCA, Sylvania, Siemens, Telefunken, AEG, Tungram, RFT [Germany] and Tung-Sol, all of whom stopped manufacturing around 40 years ago.

The quality of current production Chinese tubes and valves has greatly improved. We also stock Sovtek [Russia], Svetlana [Russia], JJ [Slovakia], Ei [Yugoslavia], Western Electric & KR Ent. [Czech Republic].

**This catalogue contains lists of**

Tubes for guitar amplifiers, hi-fi, domestic radio, amateur radio, RF welding as well as tubes for medical and industrial applications
Camera tubes
CV type
Klystrons
Photomultipliers
Thyratrons
Transmitter valves
Travelling wave tubes
TR cells
Chinese, Russian and EI [former Yugoslavia] valves, all types available, please enquire.

This catalogue is only a guide. Prices are usually accurate, but please contact us to confirm final prices and quantities.

**PLEASE ADD 50% RETAIL SURCHARGE FOR ORDERS UNDER GBP240.**

## THE GRADE IS COLOUR CODED FOR EASE

**BLUE = NOS (MAJORITY OF STOCK)**

**And the whole line is in blue**

**RED = GRADE ONE\***

**GREEN = USED**

\* **Grade One** valves are slightly used items of best physical appearance.

Unless stated otherwise they have small stains in the glass. Stains may also mean small imperfections to getter, base, for example.

Occasionally we have **Grade One** items with NO stains. These cost MORE THAN THE PRICES LISTED in this catalogue. Please enquire for prices.

In **all** cases **Grade One** items are individually tested to a **minimum** of **80 percent** emission [gm] and **minimum** of **80 percent** Ia. They are **guaranteed** and presented in attractive packaging. Statutory rights are unaffected.

Selected with the **audiophile** in mind. Standard used valves sometimes have print missing making it hard to see the type number and brand logo.

**Grade One** valves always carry the type number and appropriate **logo** [**GEC, Mullard, Sylvania** etc.]

**Grade One** are superior in appearance and performance to usual used valves supplied by other companies.

***Most tubes & valves in our warehouses are not already tested  
as this is done after a definite order is placed***

## MATCHED SET TESTING

Available on request. We can test new valves into pairs, quartets, octets etc. This test involves all valves in the match being within 10 percent of one another on anode current and gm.

Matched pairs: GBP3.00 per anode TRADE, or GBP5.00 per anode RETAIL.

Matched quads, triplets, sextet, etc: GBP5.00 per anode TRADE, or GBP7.00 per anode RETAIL.

Matched pair testing is "subject to availability". To make 1 match pair we need 10 or 20 tubes of the same brand & appearance. If we have, for example, 5 of one brand the chance of a match pair from 5 pieces is very unlikely.

This catalogue is only a guide. Prices are usually accurate, but please contact us to confirm final prices and quantities.

**PLEASE ADD 50% RETAIL SURCHARGE FOR ORDERS UNDER GBP240.**

## **BILLINGTON GOLD**

**Billington Gold** valves are individually tested within very tight limits and inspected for superior physical conformity and mechanical construction.

**Billington Gold** valves make valve amplifiers sound better.

**Billington Gold** valves are:

- Selected from the best world-wide manufacturers with emphasis on the highest audio quality and product reliability.
- Selected for long life, low microphony and low noise.
- Guaranteed for 12 months from dispatch date. Statutory rights unaffected.
- Supplied with original logo and in an attractive blue/red/gold original box.
- Gold plated pin versions are available.

**Billington Gold** valves have a good reputation world-wide especially amongst Asian audiophiles.

If your order consists ENTIRELY of **Billington Gold** items, then dispatch of your parcel will be faster than orders of other brands. Same day dispatch is sometimes possible on Billington Gold items.

## **STOCKLIST**

We do not have all of our stock listed in our catalogue, therefore please visit our website and find the free download called Stocklist on the bottom right-hand side at:

[www.billingtonexportltd.com/catalogue-1](http://www.billingtonexportltd.com/catalogue-1)

The list is not 100% accurate as we hold so much stock, but it gives you a good idea. Quantities vary from a single piece to many thousands, depending on the type.

Please contact our sales office who will be very happy to supply details of quantities, brands and prices.

## **TECHNICAL INFORMATION PROVIDED IN THE CATALOGUE**

We will advise where possible, but data etc provided in the catalogue assumes that you are an experienced electronic technician.

Please note that several people have provided us with technical data (mainly more than 10 years ago). You are free to use this data as a free gift, in good faith, if you are an experienced electronic technician, to study and aid development of your own ideas.

Data provided in the catalogue is believed to be good quality and correct but we don't accept responsibility for the results.

The data you see in the catalogue is therefore intended to be a guide only - not step-by-step instructions.

We try to be helpful but advice, available by email only, is limited. We cannot usually advise about valve data by telephone.

This catalogue is only a guide. Prices are usually accurate, but please contact us to confirm final prices and quantities.

**PLEASE ADD 50% RETAIL SURCHARGE FOR ORDERS UNDER GBP240.**

## **VISITS OR GOODS COLLECTION**

*Visitors to our premises **by appointment only** please*

If you would like to collect goods from our premises, please state specific items required

**3 working days** before your pre-arranged visit, so that we can collect items from one of our buildings and carry out testing etc, thank you (we are closed Saturday/Sunday and UK Bank Holidays). *We like to help, but please understand that we are a wholesaler, not a retail shop. Often we can improve on the 3 days mentioned above, if it's agreed in advance .*

**Please refer to our website for our full terms and conditions:**

**[www.billingtonexportltd.com](http://www.billingtonexportltd.com)**

This catalogue is only a guide. Prices are usually accurate, but please contact us to confirm final prices and quantities.  
**PLEASE ADD 50% RETAIL SURCHARGE FOR ORDERS UNDER GBP240.**

## CATALOGUE INDEX OF TERMS AND ABBREVIATIONS

<b>ALTERNATIVES</b>	If we say, "An alternative to EF86", this does not mean it is an equivalent. If you are building equipment, you might modify the circuit, socket, etc, (to adapt the circuit, to use the alternative cheaper tube, instead of rare and expensive "classic" UK/USA made tubes like EF86). If you're investing in tubes for future audio amplifier building, tubes described as "alternative" are lower cost, more plentiful and worth considering. Ask for free data, we can often help.
<b>Audio rectifier / audio triode</b>	Tubes that can be "adapted" for audio purposes. As tubes becomes scarcer, people are adapting low cost "non-audio tubes", to possess a good stock for the future. "Audio rectifier" means tubes that can be adapted for audio, although when first built, 40, 60 or 80 years ago, their primary function was non audio.
<b>Audio type</b>	These types are already established in amplifier use.
<b>BB</b>	BUBBLE BAG. Some used valves and Grade One valves costing less than GBP2.00, will now be supplied in bubble bags.
<b>BILLINGTON GOLD</b>	Tested within very tight limits and inspected for superior physical conformity. Guaranteed. A good reputation worldwide, especially amongst Asian audiophiles. Blue/red/gold original box. Statutory rights are unaffected.
<b>BP</b>	BULK PACKED. Valve is packed in "bulk pack" or "egg crate".
<b>Conditional guarantee</b>	GUARANTEE limited to that offered to us by the individual suppliers concerned. These suppliers usually give free of charge replacements in the unlikely event of any problems, depending on the technicalities of any returned item. Statutory rights are unaffected.
<b>SEPTEMBER 2025 v1</b>	GOVERNMENT BOX.
	Valve with minimum of 80% emission, somewhat used appearance. With guarantee. Statutory rights are unaffected.
<b>G1</b>	GRADE ONE BOX. Packed in our own attractive Grade One box and packaging.
<b>MIXED</b>	A random selection of good brands. If you wish to specify particular brands, please add an extra GBP1.00 per valve for sorting.
<b>NOS</b>	NOS means "new old stock." Vintage made valves that are in new condition. NOS tubes are vintage manufacture, discontinued, rare and obsolete. New, yet old, hence NOS. 90 percent of our tubes are over 40 years old. If the original boxes "OB" have not survived the years, then we supply the valves in clean white boxes "WB". Our catalogue will show "OB" or "WB" accordingly. All of the above is standard practice throughout the valve industry. Statutory rights are unaffected. We want you to be satisfied. Unless specifically marked otherwise, all tubes carry our "no fuss" guarantee.
<b>OB</b>	ORIGINAL BOX – if denoted 'original box' we will supply to you in the manufacturer's old original individual boxes.
<b>POA</b>	PRICE ON APPLICATION - we might or might not have stock, please enquire.
<b>Potential audio type</b>	<ul style="list-style-type: none"> <li>* If you or your clients want to build audio amplifiers with fresh, innovative types of tube, then "potential audio types" are for you.</li> <li>* Our consultants have successfully built audio amplifiers with many of these types. Potential audio types are better value for money compared with "well-known" audio valves (such as ECC83, 300B, EL34, KT88 etc).</li> <li>* The advantage to you of these types is that for a lower cost you get a UK/USA made item. UK/USA are often expensive and very limited in quantity.</li> <li>* Potential audio types are available in good quantities, good quality and a low price.</li> <li>* Please refer to "audio rectifier." Further up this page.</li> </ul>
<b>PRICE</b>	All prices are in British Pounds Sterling (GBP). <b>Please contact us for confirmation and current quotation.</b> All items are offered subject to prior sale. Quantities available and prices vary. Unless specified otherwise all prices, including bulk offers eg 4 pieces @ GBP50, are for <b>one tube</b> .
<b>SIMILAR</b>	When we refer to a tube as being similar it means that the data is close to that of the original tube but the data/socket/pinout may be different. Please ask us for a data sheet, which should provide the necessary information. See also "similarities".
<b>SIMILARITIES</b>	When we refer to a tube as having similarities to another, this means that the data is fairly close to the original, but the data/socket/pinout may be significantly different, so the circuit may require modification. <i>If you're investing in tubes for future audio amplifier building, these UK/ USA made tubes are worth considering as there is a good supply of them at sensible prices, especially if new designs are being considered.</i>
<b>USED</b>	Ex-equipment/pulls, not new appearance but carefully tested, with clean appearance. 60% to 80% emission. With guarantee. Statutory rights are unaffected.
<b>WB</b>	Unless clearly stated as Used, white-boxed items are genuinely new, clean, with guarantee. Statutory rights are unaffected.

This catalogue is only a guide. Prices are usually accurate, but please contact us to confirm final prices and quantities.

6CG7 / 6FQ7	USED	40 x Raytheon logo made in Japan. 40 x Mazda logo made in Japan, 4 x Sylvania made in USA. Useful audio double triode. Decent appearance for a used tube. Match pairs possible for a fee. Used tested guaranteed.	WB	3.00   50 @ 2.65   300 @ 2.40
6CG7 / 6FQ7	USED	Used, tested with logo USA made. Westinghouse, GE, Sylvania, with logo, tested Grade 1. Minimum 80% emission, bulk pack & quite clean for a used tube.	BP	5.00   20 @ 4.00   100 @ 3.00
6CG7 / 6FQ7	USED	Used, tested with logo USA made. Westinghouse, GE, Sylvania, with logo, tested used. Minimum 65% emission.	BP	4.00
6CG7 / 6FQ7	USED	RCA logo, USA. <b>Clear top</b> , some black anode. In sets of 4 pieces identical, ie same construction, same print, etc. Used not new appearance but decent appearance, tested 65 per cent + and guarantee.	WB	10.00   10 @ 9.00   100 @ 7.00
6CH6 / CV4055	NOS	Brimar logo, UK NOS.	GVT	5.5
6CH6	NOS	Brimar, UK, description exactly as below but these have GVT prints and NO Brimar logo. NOS printed CV4055. GVT crates of 100. 6CH6 was utilised by the British military being of longer life and more reliable than EL84. Transformers designed for EL84, EL33, KT61 might be applied to 6CH6 if you have specialist knowledge. The 6CH6 gives a crisp low distortion audio output. 6CH6 is VERY similar to EL33 and KT61, but EL33/KT61 is octal base. 6CH6 also has similarities to EL84 (not equivalent). Data: Vf=6.3V, If=750mA, Va=250V, Ik=40mA, S=11mA/V, Pa=12W.	GVT	5.00   100 @ 4.00

6CH6	NOS	Brimar logo, UK, NOS printed CV4055. These are slightly cheaper as they're white box, but still 100% genuine NOS tubes & guaranteed. EL33 data <a href="http://tubedata.itchurch.org/sheetsE1.html">http://tubedata.itchurch.org/sheetsE1.html</a>	WB	4.50   20 @ 3.80   100 @ 3.20
6CH6	NOS	Audio amplifier. Some years ago, our agent constructed an amplifier [parallel push pull class AB1] using 4 x 6CH6 valves [plus 6C4, 6BR7, 5U4G] [EL821=6CH6=CV4055]. We can send you a free circuit diagram and data to build this 15watt stereo amplifier. The amplifier gives excellent crisp clear sound when used with a CD player. Demonstration of the amplifier maybe possible by appointment at our agent's office. 6CH6 has some similarities to EL84 but is not equivalent. 6CH6 B9A base is near equivalent to the octal base KT61/EL33. [6CH6 in class AB1 has Vf 6.3v, Vg1 6.7v, Vg2 250v, Va 250v, Ia 30 mA, Ig2 4mA]. Free sample of Brimar 6CH6/CV4055 available [limited to one per customer].		
6CH6 / CV4055	NOS	Was used by the British military being of longer life and more reliable than EL84. 6293	NOS	possible replacement for 6146B. USA NOS. Tested and guaranteed, 4 of this brand, 4 of that brand: GE, RCA Westinghouse etc. 6293 is a pulse rated version of 6146B. 6293 has a lower anode dissipation, but only nominally because this was intended for high voltages peaks. Reverse-emission from the heated up anode had to be avoided, so the anode was specified to run colder - hence the nominally lower plate dissipation ratio - all designed for a situation that does not occur in ham radio equipment. 6293 can replace 6146B in most cases.	OB/WB	24
6336 / A	NOS	All USA made. NOS. 3 electrical match pairs but 6 different brands, none are 2 of the same appearance.	OB/WB	35.00   6 @ 30.00

EL84 / EL84R	NOS	These are Brimar EL821 / 6CH6 UK NOS with a gold pin adaptor. Glass printed EL84R. Matched pairs available. 1970's vintage, genuine British made Brimar EL821 / CV4055 / 6CH6 pentode with adapters to use directly in place of EL84 tubes. A good way to get British NOS quality, without the expense of NOS EL84 tubes. NOS tested/guaranteed. EL821 / 6CH6 / CV4055 is an output power pentode with characteristics very similar to EL84, but with a different pinout. Data: <a href="http://tubedata.philipse.info/">http://tubedata.philipse.info/</a> if you have difficulty please contact our office. An Amplifier diagram for EL821 available from our office. These adapters are only suitable for amplifiers where the tubes sit UPRIGHT, not sideways or upside down. So they're good for hi-fi, but not recommended for guitar amplifiers, unless there are retainers to hold the tubes in.	OB/WB	7.50   50 @ 6.00
